Portfolio | GitHub | Linkedin

A hopeful and ambitious web developer with a great desire to impact other people's lifestyle by making different software solutions. Recently, I did a full stack web developer based course mainly focused on react and express js. In 2021, I also did a MSc in computer science in the UK to develop my skills. By doing these things, I am still trying to improve my knowledge, build a good community and serve in the IT industry.

Work Experience

Software Engineer Intern
Appifylab - Akhter shopping city, 2nd floor, Modina Market, Sylhet, Bangladesh
February 2019 to June 2019

- By using Vue.js, Laravel and mysql to implement login systems and basic pages.
